* Discipline/profession specific contributions to tobacco treatment that could involve counseling, education, or other non-clinical interventions. These would be seen as useful for ATTUD membership to aware of as these contributions might augment or complement their own treatment/services.

** Key discipline/profession specific resources/websites that would benefit ATTUD membership. These should be non-proprietary and not based on membership to any professional organization, i.e., ATTUD can disseminate the resources to all membership.

*** Status of Tobacco Control Activity refers to any policy statements, known discipline specific guidelines or training, etc. from national professional organizations regarding tobacco dependence.
